Fabriform • Fabion

New Breakwater in
Semi Submerged
Precast Concrete
Units

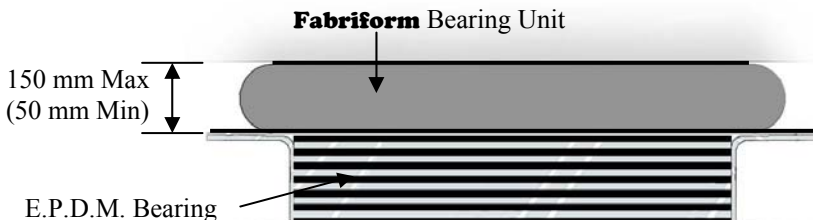

Fabriform bearing unit formed with E.P.E.M. rubber top and bottom for friction purposes. Sides in permeable fabric. Bearing filled with high strength sand:cement micro concrete (90 N/m²)

Prototype Test

The prototype test as seen above, (Top shutter removed) was pump filled underwater to prove adequacy with use of E.P.D.M. top and bottom. Bearings 1 m wide x 4.5m to 7.5 m long.

Vertical Bearing Detail

Horizontal Bearings to shear pins also formed in **Fabriform** system.
