**Fabriform**

New Breakwater in Semi Submerged Precast Concrete Units

**Fabriform** bearing unit formed with E.P.E.M. rubber top and bottom for friction purposes. Sides in permeable fabric. Bearing filled with high strength sand:cement micro concrete (90 N/m<sup>2</sup>)

Vertical Bearing Detail

Prototype Test

The prototype test as seen above (Top shutter removed) was pump filled underwater to prove adequacy with use of E.P.D.M. top and bottom. Bearings 1 m wide x 4.5m to 7.5

Horizontal Bearings to shear pins also formed in **Fabriform** system.
