Fabriform

Stranraer Port, Scotland

Typical Section

Advantages

- Natural appearance & wave absorption properties of Rip Rap above low water level
- Longer life span and greater reliability of **Fabriform** below low water level
- Matt's positioned and zipped together underwater by divers then filled with micro concrete gives reliable system
- Rip Rap often proves unreliable when installed to sand slopes underwater
- **Fabriform** requires no marine maintenance work
- **Fabriform** mattress protects against currents to 7 m/s & wave action with significant height to 1.2m
